

Your Business as Music

Creativity | Innovation | Team Building

Svante & Erik will take your Governing Document or your Power Point and create songs on the spot, in front of the participants' eyes. We twist the concepts in a playful and humoristic way. Are the Company Core Values well anchored? Then we lighten the anchor, sail out and see where it takes us.

We call the method **Nevergreens**, songs that are created and disappear in the moment. We are the singer Svante Lodén and the pianist Erik Hjärpe. With our 25 years in the esteemed music group Timbuktu & Damn! and a life as creators, with Nevergreens, we have developed a concept where creativity really is put at the forefront. It's a new level of challenge.

In the creative flow, we take in the moment with all our senses. Become open to each other's impulses. And then we jump. Straight out.

We fail, we fall.

But that fall is a forward movement. It is exactly the kinetic energy we need to lift. Suddenly we feel like we are flying.

With piano, singing and communication in the room, the senses are opened to unexpected solutions. We will guide you together, through a situation where no one knows what will happen next. The audience is constantly participating with input. It's a perfect way to explore creativity while building a team. And furthermore, we will have a very enjoyable time together!

The session is very tangible. We take your current work situation and turn it into a musical.

The Governing Documents are suddenly pure rock n' roll. And how does the finance department actually work? A few quick questions and we have the embryo of a soul ballad. Does is sound stupid? Even unprofitable? That's what our mind trick is. To let the senses work freely as they want for a while.

Let us take you on a pleasurable experience, where every fall becomes a new opportunity to fly.

Scope 30-90 minutes **Language** Swedish or English

Form a pure concert, or music mixed with a conversation about creativity, always in dialogue

Where in the conference room or on a stage, where we can be focused together with the participants
